Full Stack Web Developer

PROFESSIONAL SUMMARY

Proficient MERN-stack Full Stack Web Developer with a strong foundation in building solo and collaborative projects. Adept at crafting innovative web solutions, blending technical expertise with teamwork and problem-solving skills. Ready to drive web development excellence.

PROJECTS

1. PRECIOUS AND CHARMS | 🌐 | 🇮🇳

HTML5 | CSS3 | Chakra UI | React.js | Redux | TypeScript

- Developed a high-performance e-commerce website specializing in jewelry, watches, and accessories called Precious Charms.
- Implemented user registration and login functionality.
- Enabled users to easily browse and filter products by category and brand and sort by price.
- Implemented features for adding items to the cart, checkout, payment processing, and order placement.
- Implemented pagination in the product section for improved user experience.
- Admins had the ability to log in, manage products (add, edit, update details), and view user details including their cart and order information.

2. Blossom | 🌐 | 🇮🇳

HTML5 | CSS3 | React.js | JavaScript

- Created Blossom, an online language learning website allowing users to browse language courses.
- Implemented user registration and authentication.
- Developed functionality for users to purchase courses and manage their carts.
- Conducted CRUD operations to manage course information.
- Independently built this project within a timeframe of 5 days.

3. Trypot Nation | 🌐 | 🇮🇳

HTML5 | CSS3 | JavaScript | Bootstrap | jQuery

- Developed Trypot Nation, a platform for ecotourism enthusiasts to discover sustainable travel experiences and learn about environmental conservation.
- Implemented user registration and authentication features.
- Designed and implemented package browsing and cart functionality.
- Conducted CRUD (Create, Read, Update, Delete) operations to manage travel packages.
- Implemented responsive web design.

- Musics
- Hiking
- Badminton
- Football

WORK EXPERIENCE

Ovive Technologies .Hyderabad

Mold Tool Designer

January 2021 - August 2022

Job responsibilities:

- Designed precision molds, optimized manufacturing processes, and ensured product quality.
- Spearheaded electrode design, enhancing the efficiency of the EDM (Electrical Discharge Machining) process.
- Conducted vital research and development activities, leading to innovative solutions and improved product performance.
- Meticulously executed detailing tasks, contributing to the precision and reliability of mold designs.
- Innovatively designed fixtures, streamlining production and reducing setup times.

Roots Pvt. Ltd.Coimbatore

Tool Maker Trainee

March 2019 - January 2020

Job responsibilities:

- Assisted in the manufacturing of molds, acquiring hands-on experience in the production process.
- - Collaborated with senior team members to troubleshoot and resolve manufacturing challenges.
- - Contributed to the production of high-quality molds, meeting strict quality standards and deadlines.
- - Gained valuable insights into toolmaking techniques and processes, enhancing skills and knowledge.
